

GRANICRETE
INTERNATIONAL

Antique White Granite

For this finish you will need:

1. Stonehenge-Dispersion
2. Ponderosa Green – Acryli-Shade
3. Desert Brown – Acryli-Shade
4. Antique White – Acryli-Shade
5. Black FX

Mixing Procedure:

1. Mix Stonehenge (2 caps to 24oz of water) into a *Granicrete* professional spray bottle.
2. Mix Ponderosa Green (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*.
3. Mix Desert Brown (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*
4. Mix Antique White (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*
5. Mix Black FX (2 caps to 24oz of water) into a *Granicrete* professional *spray bottle*

Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Mist and speckle 90% of the surface using Stonehenge. While still wet, proceed.
3. Mist and speckle 35% of the surface using Ponderosa Green. While still wet, proceed.
4. Mist and speckle 40% of the surface using Desert Brown. While still wet, proceed.
5. Mist and speckle 70% of the surface using Antique White. While still wet, proceed.
6. Mist and speckle 50% of the surface using Black FX.
7. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

Professional Tip: Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.
