

**GRANICRETE**  
INTERNATIONAL

## Jungle Fury

### For this finish you will need:

1. Cherokee-Dispersion
2. Saltillo FX
3. Teal Green-Dispersion
4. Blinding White – Acryli-Shade
5. Black FX

### Mixing Procedure:

1. Mix Cherokee (3 caps to 24oz of water) into a *Granicrete* professional spray bottle.
2. Mix Saltillo FX (2oz to 20oz of water) into a *Granicrete* professional *spray bottle*.
3. Mix Teal Green (3 caps to 24oz of water) into a *Granicrete* professional *spray bottle*.
4. Mix Blinding White (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*.
5. Mix Black FX (2oz to 20oz of water) into a *Granicrete* professional *spray bottle*.

### Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Stream and spot flood 70% of the surface using Cherokee. Allow to dry before proceeding.
3. Mist and speckle 30% of the surface using Saltillo FX. Allow to dry before proceeding.
4. Mist and speckle 20% of the surface using Teal Green. Allow to dry before proceeding.
5. Mist and speckle 40% of the surface using Blinding White. Allow to dry before proceeding.
6. Mist and speckle 60% of the surface using Black FX.
7. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

**Professional Tip:** Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.

### Jungle Fury Notes:
