

GRANICRETE
INTERNATIONAL

Snow Storm

For this finish you will need:

1. Black FX
2. Blinding White – Acryli-Shade
3. Table Mesa Tan – Acryli-Shade

Mixing Procedure:

1. Mix Black FX (2oz to 20oz of water) into a *Granicrete* professional spray bottle.
2. Mix Blinding White (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*.
3. Mix Table Mesa Tan (4oz to 20oz of water) into a *Granicrete* professional *spray bottle*

Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Stream and flood 100% of the surface using Black FX. While still wet, proceed.
3. Stream and spot flood 70% of the surface using Blinding White. While still wet, proceed.
4. Stream and spot flood 15% of the surface using Black FX. While still wet, proceed.
5. Mist and speckle 20% of the surface using Table Mesa Tan.
6. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

Professional Tip: Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.

Snow Storm Notes:
