

GRANICRETE
INTERNATIONAL

Sunoka Sand

For this finish you will need:

1. Antique White – Acryli-Shade
2. Table Mesa Tan – Acryli-Shade
3. Desert Brown – Acryli-Shade
4. Taupe-Dispersion
5. Stonehenge-Dispersion

Mixing Procedure:

1. Mix Antique White (4 caps to 26oz of water) into a *Granicrete* professional spray bottle.
2. Mix Table Mesa Tan (4 caps to 26oz of water) into a *Granicrete* professional spray bottle.
3. Mix Desert Brown (4 caps to 26oz of water) into a *Granicrete* professional spray bottle.
4. Mix Taupe (2 caps to 26oz of water) into a *Granicrete* professional spray bottle.
5. Mix Stonehenge (2 caps to 26oz of water) into a *Granicrete* professional spray bottle.

Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Mist and spot flood 30% of the surface using Antique White. While still wet, proceed.
3. Mist and spot flood 30% of the surface using Table Mesa Tan. While still wet, proceed.
4. Mist and spot flood 30% of the surface using Desert Brown. While still wet, proceed.
5. Steam and speckle 10% of the surface using Taupe. While still wet, proceed.
6. Mist and spot flood 30% of the surface using Stonehenge. Allow to partially dry before proceeding.
7. Mist and speckle 30% of the surface using Table Mesa Tan. While still wet, proceed.
8. Mist and spot flood 20% of the surface using Stonehenge. While still wet, proceed.
9. Mist and speckle 20% of the surface using Taupe.
10. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

Professional Tip: Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.

Sunoka Sand Notes:
