

## **SUBJECT: USDA COMPLIANT EPOXIES AND SEALERS**

The following products meet USDA performance requirements per CFR Title 21, Part 175.300 as a concrete epoxy and/or sealer for floors, countertops, or walls:

### **Epoxies:**

- CRYSTAL TOP EPOXY, CRYSTAL TOP EPOXY AHD, MVEP, CA-FD, REAL METALLIX, NOVOLAC SA220

### **Sealers:**

- Poly Low Odor, WB-P53, SL-P60, Polyurea 80C

These products are manufactured per Granicrete's specifications and supplied by Granicrete International, Inc.

These products are suitable for application and should be applied per our Product Specification-Data Instructions. For U.S.D.A. minimum performance criteria, these products are best applied when the temperature of ambient and surface to be coated is 60°F or above. All coats of these products should be allowed to cure at temperatures of 65°F or above.

Their use will not result in harming any food products when used and applied as stipulated. These products will stand up to heavy duty cleaning and dampness and are grease and acid resistant. They are impervious to moisture. They do not have any known carcinogens, mutagens, or teratogens classified as substances. They are not listed as pesticides, nor do they have any known characteristics associated with pesticides.

Sincerely,

Marc Winkelman, Founder
