

## Valley Ponderosa

### For this finish you will need:

1. Stonehenge-Dispersion
2. Ponderosa Green – Acryli-Shade
3. Table Mesa Tan – Acryli-Shade
4. Sienna Yellow – Acryli-Shade
5. Black FX

### Mixing Procedure:

1. Mix Stonehenge (2 caps to 26oz of water) into a *Granicrete* professional spray bottle.
2. Mix Ponderosa Green (4oz to 26oz of water) into a *Granicrete* professional spray bottle.
3. Mix Table Mesa Tan (4oz to 26oz of water) into a *Granicrete* professional spray bottle.
4. Mix Sienna Yellow (4oz to 20oz of water) into a *Granicrete* professional spray bottle.
5. Mix Black FX (2 caps to 24oz of water) into a *Granicrete* professional spray bottle.

### Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Mist surface with water.
3. Mist and speckle 90% of the surface using Stonehenge. While still wet, proceed.
4. Mist and speckle 35% of the surface using Ponderosa Green. While still wet, proceed.
5. Mist and speckle 70% of the surface using Table Mesa Tan. While still wet, proceed.
6. Mist and speckle 40% of the surface using Stonehenge. While still wet, proceed.
7. Mist and speckle 50% of the surface using Black FX. While still wet, proceed.
8. Mist and speckle 20% of the surface using Sienna Yellow. While still wet, proceed.
9. Mist and speckle 20% of the surface using Black FX.
10. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

**Professional Tip:** Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.

**Valley Ponderosa Notes:**
