

Volcanic Ash

For this finish you will need:

1. Groutline Grey-Dispersion
2. Black FX

Mixing Procedure:

1. Mix Groutline Grey (3 caps to 24oz of water) into a *Granicrete* professional spray bottle.
2. Mix Black FX (2oz to 20oz of water) into a *Granicrete* professional *spray bottle*

Step-by-Step Procedure:

1. Apply all Granicrete Countertop Blend coats per installation instructions.
2. Stream and Flood 100% of the surface using Groutline Grey. Allow to dry completely before proceeding.
3. Mist and speckle 55% of the surface using Black FX.
4. Allow surface to completely dry and then apply Granicrete Crystal Top Epoxy per product instructions.

Professional Tip: Constantly shake up FX colors while being used in a spray bottle. The powder within each FX color is what makes them unique. If the color rest in the spray bottle the powder will settle to the bottom.

Volcanic Ash Notes:
