---

### Description and Use:

Granicrete's Super Concentrated Dispersion Colorants can be mixed integrally with Granicrete Base and Texture Blend to achieve a desired color. They are also mixed with water and used as a topical colorant to achieve a stone-like colors and looks.

This engineered product used in the following applications

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> Floor Overlays / Micro-Toppings | <input checked="" type="checkbox"/> 3D              |
| <input checked="" type="checkbox"/> Interior                        | <input type="checkbox"/> Epoxy Flooring             |
| <input checked="" type="checkbox"/> Exterior                        | <input checked="" type="checkbox"/> Shower FX       |
| <input checked="" type="checkbox"/> Countertop                      | <input checked="" type="checkbox"/> Outdoor Islands |

### Advantages:

- Vast range of different colors
- Multi-use product within all Granicrete Systems
- Authentic stone colors

### Color:

Refer to the Dispersions Color Chart for its many colors.

### Mixing:

**Integral:** 2 to 10 caps of Dispersion Colorant per 50lb bag of Base or Texture Blend. Can be used with Countertop Blend but be sure to know lbs of Blend to caps on your Trowel Coats.

**Wash:** 3 caps of Dispersion Colorant to 24 oz of water

**Antique:** 1 gallon water; 6-10 caps of Dispersion Colorant; 24oz of Polymer

Granicrete recommends that all our systems have some degree of topical colorant to enhance the stone like finish and reduce any error when mixing colors integrally.

\*Dispersion Colorants must be diluted with water. They should **NEVER** be applied directly to the surface without being diluted.

### Application:

Dispersion Colorants can be mixed integrally into Granicrete Base and Texture Blend to achieve a desired color.

Washes and Antiques can be sprayed, brushed or sponged onto the surface to achieve the desired look.
